ABOUT US

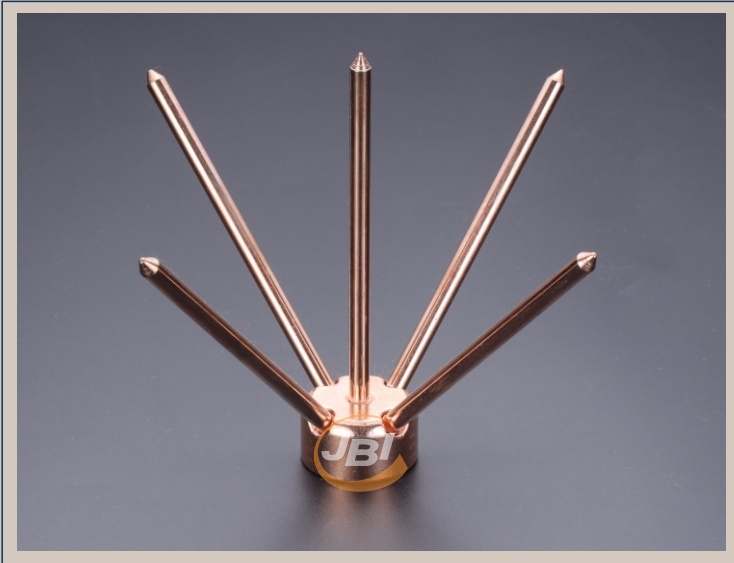

At the heart of JAY BRASS INDUSTRIES is an unwavering dedication to quality. We adhere to strict quality control measures throughout the manufacturing process to ensure that each product leaving our facilities meets the highest standards. Our commitment to excellence is reflected in the durability, functionality, and aesthetic appeal of our metal products.

A lightning arrester (alternative spelling lightning arrestor) (also called lightning isolator) is a device, essentially an air gap between an electric wire and ground, used on electric power transmission and telecommunication systems to protect the insulation and conductors of the system from the damaging effects of ...

The earthing or grounding system is the heart of any electrical installation. The safety of the people and equipment connected to it depends on its design, its execution and its condition, as the excess current will flow to earth, preventing personal injury and failure of the electrical components connected to it.
